ECDOTE OF PROFESSOR JUNKER OF THE UNIVERSITY OF HALLE.

Many, who were personally acquainted with celebrated character, have frequently heard relate the following anecdote:

being professor of anatomy, he once procu- h, for dissection, the bodies of two criminals 5 had been hanged. The key of the dissect- e room not being immediately at hand when were carried home to him, he ordered them e laid down in a closet which opened into r own apartment. The evening came, and ker, according to his custom, proceeded to me his literary labours before he retired to It was now near midnight, and all his fam- were fast asleep, when he heard a rumbling e in his closet. Thinking that, by some mis- , the cat had been shut up with the dead bodies, he rose, and, taking the candle, went to see what had happened. But what must have been his astonishment, or rather his panic, on perceiving that the sack which contained the two bodies was rent through the middle! He approached, and found that one of them was gone.

The doors and windows were well secured, and he thought it impossible the body could have been stolen. He tremblingly looked round the closet, and observed the dead man seated in a corner.

Junker stood for a moment motionless; the dead man seemed to look towards him, he moved both to the right and left, but the dead man still kept his eyes upon him.

The professor then retired, step by step, with his eye still fixed upon the object of his alarm,

Second Month, February, 1828.

and holding the candle in his hand until he reached the door. The dead man instantly started up and followed him. A figure of so hideous an appearance, naked, and in motion—the lateness of the hour—the deep silence which prevailed—every thing concurred to overwhelm him with confusion. He let fall the only candle which he had burning, and all was darkness. He made his escape to his bed-chamber, and threw himself on the bed; thither, however, he was pursued: and he soon felt the dead man embracing his legs, and loudly sobbing.

Repeated cries of "leave me! leave me!" released Junker from the grasp of the dead man, who now exclaimed, "Ah! good executioner! good executioner! have mercy upon me!"

Junker soon perceived the cause of what had happened, and resumed his fortitude. He informed the reanimated sufferer who he really was, and made a motion in order to call up some of the family "You wish then to destroy me!" exclaimed the criminal. "If you call any one, my adventure will become public, and I shall be taken up and executed a second time. In the name of humanity, I implore you to save my life."

The physician struck a light, decorated his guest with an old night gown, and, having made him drink off a cordial, requested to know what had brought him to the gibbet. "It would have been a truly singular exhibition," observed Junker, "to have seen me, at that late hour, engaged in a *téte-à-téte* with a *dead* man, decked out in a night-gown."

The poor wretch informed him that he had enlisted as a soldier; but that, having no great attachment to the profession, he had determined to desert; that he had unfortunately entrusted his secret to a kind of crimp, a fellow of no principle, who recommended him to a woman

a whose house he was to remain concealed; hat this woman had discovered his retreat to he officers of Police, &c.

Junker was extremely perplexed how to save he poor man. It was impossible to retain him n his own house, and keep the affair a secret, nd to turn him out of doors was to expose him o certain destruction. He resolved to conduct im out of the city, in order that he might get nto a foreign jurisdiction; but it was necessary o pass the gates, which were strictly guarded. o accomplish this point, he dressed the man n some of his old clothes, and covered him with a cloak, and, at an early hour, set out for he country with his *protegé* behind him. On arriving at the city gate, where he was well known, he said in a hurried tone, that he had been sent for to visit a sick person who was dying in the suburbs. He was permitted to pass. Having both got into the open fields, the deserter threw himself at the feet of his deliverer, to whom he vowed eternal gratitude; and, after receiving some pecuniary assistance, departed, offering up prayers for his happiness.

Twelve years after, Junker having occasion to go to Amsterdam, was accosted on the Exchange by a man well dressed and of the best appearance, who, he had been informed, was one of the most respectable merchants in that city. The merchant, in a polite tone, inquired

whether he was not professor Junker, of Halle; and on being answered in the affirmative, he requested, in an earnest manner, his company to dinner. The professor consented. Having reached the merchant's house, he was shown into an elegant apartment, where he found a beautiful wife, and two healthy children: but he could scarce suppress his astonishment at meeting so cordial a reception from a family with whom, he thought, he was entirely unacquainted.

After dinner, the merchant, taking him into his counting-room, said, "You do not recollect me?"—"Not at all."—"But I well recollect you, and never shall your features be effaced from my remembrance. You are my benefactor. I am the man who came to life in your closet, and to whom you paid so much attention. On parting from you, I took the road to Holland. I wrote a good hand, was tolerably expert at accounts; my figure was somewhat interesting, and I soon obtained employment as a merchant's clerk. My good conduct, and my zeal for the interests of my patron, procured me his confidence and his daughter's love. On his retiring from business, I succeeded him, and became his son-in-law. But for you, however, I should not have lived to experience all these enjoyments.—Henceforth look upon my house, my fortune, and myself, as at your disposal."

Those who possess the smallest portion of sensibility can easily represent to themselves the feelings of Junker.

—

A DUTCH SERMON.

The following admirable production, delivered before a company of volunteer soldiers, during our revolutionary struggle, upon the eve of their going 'forth to glorious war,' was calculated to inspire them with more than Herculean strength and courage. *Parthenon.*

Mine Frinds:—Ven virst you comed here, you was boor and lousy, and now frients you is prout and zassy: and yous gotton on your unicorns, ant dem vits you like a dongs upon un hogs pack; now mine frients, let me dell you

is, a man is a man if he's no bigger as my dumb. 'Den Tavid vent out to fight vid Goliah, he dook nothing vid him put one sling; now don't mistake me mine frients; it was not a rum sling; no, nor a gin sling; no nor a mint vater sling; no, it vas a sling mate vit an hickery sthick. Now ven Goliah sees Tavid coming, he says, 'you little tampt scoundrel, does you come to fight me? I will give you to the pirds of the fielt, and de peasts of the air.'—Tavid says, Goliah, the race ish not always mit the shwift, nor ish de pattle mit the strong, and man is a man if he's no pigger as my dumb. So Tavid he fixes a sthone in his shling, and he drows it at Goliah, ant knocks him rite in the vorehead, and den Tavid takes Goliah's swort and cuts off his heat—and den all the pretty caals of the shiddy comes out, and strewed flowers in his way, and sung Saul is a creat man, for he has kilt his dousands, put Tavid is creater as he, vor he has kilt Goliah.

Now mine frients, when you coes out to fight mit the tampt Pritish, remember vat I dell you, dad a man is a man, if he's no pigger as my dumb.

—

THE LAWYER AND HIS DOG.

A short time since, a dog, belonging to a certain limb of the law in an adjacent township, very unceremoniously entered a butcher's shop, and made free with an excellent leg of mutton; neither stopping to inquire the price nor to as-

certain the weight thereof. The dog, however, it appears, was well kuown, and the poor butcher immediately proeeeded to the owner's house. The case, (barring the person's name to whom the dog belonged) was stated to Mr. Latitat, and inquiry made if the value of the mutton could not be recovered. "O, most certainly, I will write to the person immediately." The cunning 'flesher' having thus ascertained the law of the case, begged leave to inform the attorney that *his* dog was the aggressor! "O! very well, what is the price of the mutton?" "Three and fourpence," exclaimed the overjoyed butcher. "There it is Sir," replied the attorney, throwing down the money, which was eagerly taken up by the other, who then proceeded very leisurely to leave the house, when the attorney called him back, and addressed him in the following language:—"I have paid you for the mutton; my charge for advice is 6s. 8d. which I insist upon your paying immediately!" The butcher put on a dreadful face at the mortifying information; and knowing there was no way to escape, drew forth the money, and paid the lawyer his fee, determined, in his own mind never to attempt to outwit an attorney again.

From the Nantucket Enquirer.

The *Sea Serpent* has again made his appearance in a variety of shapes. Certificates and affidavits duly avouched by common and proper names, are multiplying upon the wide mouthed world. Capt. Spiffleton of the topsail schooner Polly and Barabas, from East Puzzlebury for Knuckleshough, in latitude 97, longitude 372, saw a strange animal with a head like a tar-barrel and a tail like an anchor fluke, serpentining majestically over the sea's surface at a distance of forty-one feet three inches and a barleycorn. The monster was exactly seventeen furlongs in length from end to end, or from beginning to beginning. Being a phrenologist, the captain particularly noticed the humps, of which there were eighty-four, in the shape of

ool sacks. On discharging a rotten potato, the erpent popped under the water and was off. he cook's mate, a very respectable coloured entleman, well known to the Rev. Mr. Wigsy, who was at that moment frying onions in he camboose house, with his face towards the eather door, testifies also to the foregoing acts.

Another equally authentic relation is given y the master and crew of a Nova Scotia East ndiaman, bound on a mackarel voyage to the erman ocean. While off Cape Schaarkro, they oarded the wreck of a large brig; the masts pars, sails and rigging were all gone. Near he hatchway, which was open, lay several oblong substances resembling large bladders of snuff; these were carefully deposited in the boat. On going aft, one of the men observed written upon the binnacle, this memorandum: —" June 4th, squally—closereefed foretopsail —at 10 P M. all hands devoured by a sea serpent; so ends these twenty four hours." While consulting on this strange inscription, a noise was heard below; presently a hogshead of tobacco was seen slowly rising out of the hold; and as it ascended, two enormous jaws were discovered grasping its nether bilge. The terrified seamen hurried into the boat, and took to their oars. By the time they had rowed off two cables' lengths, the hogshead reached an alti-

tude of forty-five degrees, supported by the black head and shining neck of an enormous creature of the snake species. After arriving at the ship, Captain Dunderdunck watched the reptile with his glass, and distinctly saw the tobacco fairly engorged. Whereupon a classical passenger from Oxford exclaimed:

Quidquid in altum fortuna tulit, ruitura levat.

The snuff col ured spheroids, which are undoubtedly serpent's eggs, have been carried to London, where, under the direction of the Royal Society, they are to be hatched during the next sitting of parliament.

The sea serpent was not a stranger to the aboriginal inhabitants of New England. Some time in the fifteenth century, the Indians upon this and the neighbouring islands suffered excessively from a long drought. The corn blades were crisped, the turn pike vines withered and the green blackberries, before they wer red, dropped from the bushes. In such a state things, the appearance of a heavy black clou approaching from the south west, was greete by the tawny populace with loud demonstra tions of joy; the chiefs whooped, the squaw grinned audibly, and the papooses chattered But before the anticipated supply could reac Nantucket, a huge serpent emerged from th sea, rising perpendicularly and burrying h head in the cloud, whence he absorbed ever particle of moisture; and the vapoury remnan blew over, like a puff from the pipe of Mausho without shedding a single tear. As the monste lowered his unwieldly length, he fell partly o the southern shore, and forcing his way acro land into our harbour, again attained his el ment. The line of ponds and vallies along th

—

ARTFUL QUESTION.

Dominico, the harlequin, going to see Louis V, at supper, fixed his eye on a dish of partridges. The King, who was fond of his acting, d, "Give that dish to Dominico.?"—"And patridges, too, Sire?" Louis penetrating his , replied. "And the partridges too." The h was gold.

—

It is a subject of true wisdom to bring togethevery circumstance which may light up a ne of cheerfulness in the mind; and though must indeed be insensible, should it burn with the same unwearied brightness, yet it should be preserved as a sacred fire, never to be totally extinguished.

—

A lady, who made pretensions to the most refined feelings, went to her butcher to remonstrate with him on his cruel practices.—'How,' said she, 'can you be so barbarous as to put innocent little lambs to death?' "Why not, madam?" said the butcher; "you would not eat them alive, would you."

—

A gentleman, seeing an Irish woman skinning eels, said to her, "how can you bear to be so cruel? Dont you think you put them to a great deal of pain?" "I might sir," she replied,

—

Two friends exchanging pinches of snuff at a coffee house, an observer remarked, "you are making a profitable barter, gentlemen." "That cannot be," said one of the snuff takers, "as it is only pinch for pinch.' "Nay," rejoined the observer, "you each get scent for scent by it!"

—

God answers prayer sometimes, says one, lest we should think he hath not the power; he denies it sometimes, least we should be too much after the world; he punishes sins in part here, lest we might think he does not abhor them; he leaves some unpunished, as a proof of a jud ment hereafter.

—

The reason why some women do not wish t admire St. Paul's writings, I suppose, are these His being, as it is usually thought, a bachelor his advising people not to marry in troublou times; his commanding wives to submit to the husbands; his not allowing women to speak i public; his unwillingness that they should bro der their hair, or wear trinkets; his chargin the fall upon Eve; his disregard of old wives fa bles; and his saying that young widows becam tattlers and busy bodies.

—

A DEFFINITION.

A Scotch blacksmith, being asked the mean ing of metaphysics, explained it as follows

When the party that listens dinna ken what the party who speaks means, and the party who speaks dinna ken what he means himself—that is metaphysics."

—

What would be the effect of a poem, one line serious, one burlesque, on one and the same subject, in tragic and comic alternation? Would it the reader cry with one eye and laugh with the other?

—

THE CAGOTS.

A late traveller notices a singularly degraded people of this name, who inhabit the valley of Leize, in a wild part of the French side of the Pyrenees. They appear to be as wretched as human beings can be—the outcasts of society, a separated and degraded race, whose very touch is a pollution; even at the churches they are required to enter by a particular door, and no one will even use the "*holy water*," if they have dipped a finger into it. They are much affected with the *goitre*, and some of them are rendered hideous by it, and "their complexions are cadaverous in the extreme." They are supposed to be descendants of the Saracens, and for ages have been kept in their degraded state by the successive and cruel prejudices of other persons who hardly respect them as being of the human species. Such a race of men could not be preserved in the United States.

Niles.

IMPERIAL.

Take of Cream of Tartar three drachms—the Rind of one Lemon—pour on them a quart of boiling water; and when colder, add a sufficient quantity of fine Sugar to render the liquid palatable.

When circumstances do not forbid its use, a small quantity of white wine may be also joined with it, to improve the flavour.

TO PRESERVE GAME IN HOT WEATHER.

Game or poultry may be preserved for a long time, by tying a string tight round the neck, so as to exclude the air, and by putting a piece of charcoal into the vent.

TO MAKE OTTO, (OR ODOUR) OF ROSES.

Pick the leaves of roses from all seeds a stalks, put them into a clean earthern vess glazed within; or a clean wooden vessel. Po spring water on them, so as to cover them; s the vessel in the sun in the morning at risin and leave it in the sun-shine till sun-set; th take them into the house; repeat this for six seven days, and in three or four days there w be a fine yellow oily matter on the surface the water; and in two or three days more, the will appear a scum upon the surface, which the otto of roses. This may be taken up wi cotton, and squeezed into a phial with the fi ger and thumb.

TO CLEAN ALL SORTS OF METAL.

Mix half a pint of refined neat's-foot oil, and alf a gill of spirits of turpentine. Scrape a litle kernel of rotton stone; wet a wollen rag erewith, dip it into the scraped kernel, and b the metal well. Wipe it off with a soft cloth, lish with dry leather, and use more of the rnel. In respect to steel, if it is very rusty, e a little powder of pumice with the liquid on separate wollen rag first.

—

TO TAKE STAINS OUT OF MAHOGANY.

Mix six ounces of spirit of salts, and half an nce of rock salt of lemons, powdered, togeth-. Drop a little on the stains, and rub it with a k till it disappear. Wash off with cold water.

TO PRESERVE EGGS FOR A LENGTH OF TIME.

Put an egg for one minute in water just about to boil, (it will not in that time be hard), and it will afterwards keep well for a month. Steep one a little while in sweet oil, and it will keep for half a year.

—

TE REMOVE SPOTS OF GREASE FROM BOOKS AND PRINTS.

After having gently warmed the paper stained with grease, wax, oil, or any fat body whatever, take out as much as possible of it by means of blotting paper. Then dip a small brush in the essential oil of well-rectified spirit of turpentine, heated almost to an ebullition (for when cold, in acts only very weakly), and draw it

gently over both sides of the paper, which must be carefully kept warm. The operation must be repeated as many times as the quantity of the fat body imbibed by the paper, or the thickness of the paper, may render necessary. When the greasy substance is entirely removed, recourse may be had to the following method to restore the paper to its former whiteness, which is not completely restored by the first process. Dip another brush into highly rectified spirit of wine, and draw it, in like manner, over the place which was stained, and particularly round the edges, to remove the border, that would still present a stain. By employing these means, with proper caution, the spot will totally disappear; the paper will resume its original white ness; and if the process has been employed o a part written on with common ink or printe with printer's ink, it will experience no alte ation.

—

TO PRESERVE SEEDS FOR A LONG TIME.

When seeds are to be preserved longer tha the usual period, or when they are to be sen to a great distance, sugar, cotton, salt, saw dust, paper, &c. have been adopted with di ferent degrees of success. Chinese seeds, drie by means of sulphuric acid, in Leslie's manne may afterwards be preserved for any necessar length of time, by keeping them in an airy si

ation in common brown paper, and occasionlly exposing them to the air in a fine day, especially after damp weather. This method will ucceed with all the larger mucilaginous seeds. ery small seeds, berries, and oily seeds, may robably require to be kept in sugar, or among urrants or raisins.

—

TO TAKE MILDEW OUT OF LINEN.

Rub it well with soap, then scrape some fine halk, and rub that also in the linen; lay it on e grass; as it dries, wet it a little, and it will me out after twice doing.

—

TO TAKE STAINS OUT OF SILVER PLATE.

Steep the plate in soap ley for the space of four hours; then cover it over with whiting, and with vinegar, so that it may stick upon it, and dry it by a fire; after which, rub off the whiting, and pass it over with dry bran, and the spots will not only disappear, but the plate will look exceedingly bright.

—

TO KEEP APPLES AND PEARS FOR MARKET.

These who keep their fruit in storehouses, for the supply of the London and other markets, as well as those who have not proper fruit-rooms, may keep their apples and pears in baskets or hampers; putting some soft paper in the bottoms and round the edges of the baskets, &c, to keep the fruit from being bruised; then put in a layer of fruit, and over that a layer of

paper; and so on, a layer of fruit and of paper, alternately, till the basket or hamper be full: cover the top with paper three or four times double, to exclude the air and frost as much as possible. Every different sort of fruit should be packed separately; and it will be proper to fix a label to each basket or hamper, with the name of the fruit that it contains, and the time of its being fit for use.

—

TO STAIN PAPER OR PARCHMENT YELLOW.

Paper may be stained of a beautiful yellow by the tincture of turmeric, formed by infusing an ounce or more of root, powdered, in a pint of spirit of wine. This, by afterwards adding water to it, may be made to give any tint of yellow, from the lightest straw to the full colour called French yellow, and will be equal in brightness even to the best died silks yellow is wanted of a warmer or redder ca annotto, or dragon's blood, must be added the tincture.

—

TO STAIN PAPER OR PARCHMENT CRIMSON.

A very fine crimson stain may be given paper, by a tincture of the Indian lake, whi may be made by infusing the lake some days spirits of wine, and then pouring off the tin ture from the dregs.

—

TO RESTORE DECAYED WRITINGS.

Cover the letters with philogisticated or pru sic alkali, with the addition of a diluted mine al acid; upon the application of which the le ters change very speedily to a deep blue colo of great beauty and intensity. To prevent t

preading of the colour, which, by blotting the archment, detracts greatly from the legibility, e alkali should be put on first, and the dilud acid added upon it. The method found to nswer best has been, to spread the alkali thin ith a feather or a bit of stick cut with a blunt oint. Though the alkali should occasion no nsible change of colour, yet the moment the id comes upon it, every trace of a letter turns t once to a fine blue, which soon acquires its ll intensity, and is beyond comparison stronger than the colour of the original trace. If, en, the corner of a bit of blotting paper be arefully and dexterously applied near the letrs, so as to imbibe the superfluous liquor, the staining of the parchment may be in a great measure avoided; for it is this superfluous liquor which absorbing part of the colouring matter from the letters, becomes a dye to whatever it touches. Care must be taken not to bring the blotting paper in contact with the letters, because the colouring matter is soft whilst wet, and may easily be rubbed off. The acid chiefly employed is the marine: but both the vitriolic and the nitrous succeed very well. They should be so far diluted as not to be in danger of corroding the parchment, after which the degree of strength does not seem to be a matter of much nicety.

TO PREVENT DANGER FROM WET CLOTHES.

Keep if possible in motion, and take care not to go near a fire or into any very warm place, so as to occasion a sudden heat, till some time after you have been able to procure dry clothes.

—

TO TAKE OFF A GOLD RING STIKING TIGHT ON A FINGER.

Touch it with mercury, and it becomes so brittle that a slight blow with a hammer will break it.

—

CHOPS OR STEAKS.

Those who are nice about Steaks, *never attempt to have any, except in weather which permits the meat to be hung till it is tender*—and give the Butcher some days notice of their wish for them.

The best steaks are those cut from the middle of a Rump, that has been killed at least four days in moderate weather,—when they can be cut about six inches long, four inches wide, and half an inch thick—do not beat them, unless you expect they will not be tender Desire the Butcher to *cut them of even thickness*—if he does not, divide the thicker from the thinner pieces, and give them time accordingly.

Take care to have a very clear brisk fire, throw a little salt on, make the Gridiron hot and set it slanting, to prevent the fat from dropping into the fire, and making a smoke. It requires more practice and care than is generally supposed to do Steaks to a nicety; and for want

of these little attentions, this very common dish, which every body is supposed capable of dressing, seldom comes to the table in perfection.

Ask those you cook for, if they like it *under* or *throughly* done; and what accompaniments they like best;—it is usual to put a tablespoonful of Catsup,—or "Balls' Cavice," and a little minced Shallot into a dish before the fire, while you are broiling—turn the Steak with a pair of Steak tongs—it will be done in about ten or fifteen minutes; rub a bit of butter over it, and send it up garnished with Pickles and finely scraped Horseradish are the Sauces usually composed for Chops and Steaks.

N. B. Macbeth's Receipt for dressing a Beef Steak is the best—

—"*when 'tis done, 'twere well*

COMPOSITION FOR A CEMENT TO RESIST THE ACTION OF FIRE AND WATER.

Take half a pint of milk, and mix with it an equal quantity of vinegar, so as to coagulate the milk. Separate the curds from the whey, and mix the latter with the whites of four or five eggs, after beating them well up. The mixture of these two substances being complete, add sifted quick-lime, and make the whole into a thick paste of the consisteney of putty. If this mastich is carefully applied to broken bodies, or to fissures of any kind, and dried properly, it resists water and fire.

TO DESTROY VERMIN IN CHILDREN'S HEADS.

Take an ounce of vinegar, one ounce of

ey, half an ounce of sulphur, and two ounces f sweet oil: mix the whole well together into liniment, and rub the head repeatedly with a ttle thereof

—

TO CHANGE HAIR TO A DEEP BROWN.

A solution of the silver caustic in water is he foundation of all the nostrums for this purose. It must be well diluted before used.

—

O TAKE OFF, INSTANTLY, A COPY FROM A PRINT OR PICTURE.

Make a water of soap and alum, with which vet a cloth or paper; lay it either on a print or icture, and pass it once under the rolling press, hen going round the other side to take it up, you vill have a very fine copy of whatever you shall ave laid it upon.

—

TO DETECT THE MIXTURE OF ARSENIC.

A solution of blue vitriol dropped into any liquid in which arsenic has been put will turn it green.

KIDNEYS.

Cut them through the long way,—score them, sprinkle a little pepper and salt on them, and run a wire skewer through them, to keep from curling on the Gridiron—so that they may be evenly broiled.

Broil them over a very clear fire, turning them often till they are done: they will take about ten or twelve minutes, if the fire is brisk: or *Fry* them in Butter, and make gravy for them in the pan [after you have taken out the kidneys,] by putting in a teaspoonful of flour; as soon as it looks brown, put in as much water as will make gravy; they will take five minutes more to fry than to broil.

—

TO TRY THE PURITY OF SPIRITS.

See if the liquor will burn away without leaving any moisture behind. As spirit is much lighter than water, place a hollow ivory ball in it; the deeper the ball sinks, the lighter the liquor, and consequently the more spirituous.

TO PREVENT PAPER FROM SINKING.

If the paper used in superior editions of books, and which sinks so as to prevent its being written on, be dipped in alum-water, it may be written on. This practice was adopted by Peiresc.

—

STEWED OYSTERS.

Large Oysters will do for stewing, and by some are preferred; but we love the plump, juicy natives. Stew a couple of dozen of these in their own liquor;—when they are coming to a boil, skim well, take them up and beard them; strain the liquor through a tammis sieve, and lay the oysters on a dish. Put an ounce of butter into a stewpan,—when it is melted, put to it as much flour as will dry it up, the liquor of the Oysters, and three tablespoonsful of milk or cream, and a little white pepper and salt; to this some Cooks add a little Catsup or finely chopped Parsley, grated Lemon Peel, and juice; let it boil up for a couple of minutes, till it is smooth, then take it off the fire, put in the Oysters, and let them get warm; (they must not themselves be boiled, or they will become hard;) line the bottom and sides of a hash-dish with bread sippits, and pour your oysters and sauce into it.

PEARL WHITE.

Bismuth dissolved in aquafortis is pearl white. This though at first it whitens, afterwards blackens the skin, as all preparations from lead do; and therefore none of them are safely to be used.

—

TO PREVENT SEA SICKNESS.

Drop a few drops of vitriolic æther upon loaf sugar, and, let it dissolve in your mouth; or drink a few drops of æther, added to a solution of sugar, in water, to prevent its immediate evaporation.

—

TO PREVENT WOUNDS FROM MORTIFYING.

Sprincle sugar on them. The Turks wash fresh wounds with wine, aud sprinkle sugar on them. Obstinate ulcers may be cured with sugar dissolved in a strong decoction of walnut leaves.

OYSTRRS FRIED.

The largest and finest Oysters are to be ch sen for this purpose: simmer them in their ov liquor for about five minutes,—take them o and lay them on a cloth to drain,—beard the then flour them,—egg and bread-crumb the —put them into boiling fat, and fry them a d icate brown.

—

AN IRISHMAN'S INDIFFERENCE.

Paddy, who was arraigned before a court horse-stealing, after having pleaded not guil the judge asked him by whom he would be tri "By twelve apostles," answered the prison The judge told him that would not do, for if was tried by them he could not have his tr till the day of judgment. "Faith," says Pad "and I have no objection to that neither, fo am in no hurry about it at all, at all."

Grand Lodge of New York.

The Grand Lodge of New York was first constituted by a warrant from the duke of Athol, dated London 5th September, A. D. 1781.

In conformity to the example which had been set by the grand lodges of several states after the revolutionary contest, on the fifth September, A. D. 1787, the masters and wardens of the several lodges within the state having being duly notified, assembled in the city of New York; and the late provincial grand lodge having been closed *sine die*, formed and opened an independent grand lodge, and elected and installed their grand officers.

There are now (1826) two Grand Lodges in the state of New York. One held in Albany, of which *Stephen Van Rensselaer, Esq.* is M. E. Grand Master—The other is held in the city of New York, and *Martin Hoffman, Esq.* M. E. Grand Master.

Officers of the Grand Lodge of the state of New York.

R. W. Elisha W. King, Esq., *Grand Master.*
R. W. Richard Hatfield, Esq., *D. Grand Master.*
R. W. Henry J. Feltus, Esq., *G. S. Warden.*
R. W. Matson Smith, Esq. M D., *G. J. Warden.*
R. W. George W. Hyer, Esq., *G. Treasurer.*
R. W. Oliver M. Lownds, *G. Secretary.*
R. W. & Rev. Archibald M'Clay, D. D. } *Grand Chaplains.*
R. W. & Rev. Jona. M. Wainwright, } *Grand Chaplains.*
R. W. & Rev. James G. Ogilvie, } *Grand Chaplains.*
R. W. & Rev. Frederick C. Schæffer, } *Grand Chaplains.*
R. W. Matthew Reed, *Grand Sword Bearer.*
R. W. Mordecai Myers, *Grand Marshal.*
R. W. Charles G. Ferris, *Grand Standard Bearer.*
V. W. William M. Price, } *Grand Stewards.*
V. W. R. Pardessus, } *Grand Stewards.*
V. W. R. Malbone, } *Grand Stewards.*
V. W. Wm. L. Morris, } *Grand Stewards.*
V. W. Anthony W. Jones, *G. S. D.*
V. W. Francis Duhuar, *G J. D.*
W. Joseph Jacobs, *G. P.*
W. Gerrit Lansing, *A. G. P.*
W. Robert Young, *G. Tyler.*

The Quarterly Communications of the Grand Lodge are held on the first Wednesdays of March, June, September, and December. The Election of Grand Officers is made at the June Communication.

Wm J. Seaver — do Santa Martha.
Wm. Wheelwright — do Guayaquil.
Abra'm B. Nones — do Maracaybo.
Francis Litchfield — do Porto Cabello.
William Radcliff — do Panama.

BRAZIL.

Condy Raguet, Charge d'affaires, Rio de Janeiro
W. H. D. C. Wright, Consul, Rio de Janeiro.
Woodbridge Odlin — do San Salvador.

hn T. Mansfield do Pernambuco.
de S. Montiero do Maranhao.
harles B. Allen do Para.
shua Bond do Monte Video.
onard Corning do Isle of Maranham.

REPUBLIC OF CENTRAL AMERICA.

m. B. Rochester, App'd Charge d'affaires, Guatemala.
harles Savage, Consul, Guatemala.

REPUBLIC OF BUENOS AYRES.

hn M. Forbes, Charge d'affaires, Buenos Ayres.
eo. W. Slocum, Consul, Buenos Ayres.

CHILE.

eman Allen, Envoy Extraordinary and Minister Plenipotentiary, St. Jago de Chile.
muel Larned, Secretary of Legation, St. Jago de Chile.
ichael Hogan, Consul, Valparaiso.
niel Wynne do St. Jago de Chile.

REPUBLIC OF PERU.

mes Cooley, Charge d'affaires, Lima.
m. F. Taylor, Consul, Quilca and Arica.
illiam Tudor do Lima.

DENMARK.

enry Wheaton, Charge d'affaires, Copenhagen.
hn Raynals, Consul, Copenhagen.
bert Jaques do Isle of Santa Cruz.
than Levy do Isle of St. Thomas.
seph Ridgway, Consul, island of St. Croix.

PRUSSIA.

hn G. Baker, Consul, Elberfield.

SAXONY.

F. Goehring, Consul, Leipzig.

HANSEATIC TOWNS.

John Cuthbert, Consul, Hamburg.
F. J. Wichelhausen do Bremen.
Joseph H. Clark do Lubec.

ITALIAN STATES.

Thomas Appleton, Consul, Leghorn, Tuscany.
James Ombrosio do Florence, do
Robert Campbell do Genoa, Sardinia.
Vr. A. Sasserno do Nice, do
George Moore do Trieste, Austria.

ROMAN STATES, AND KINGDOM OF THE TWO SICILIES.

Felix Cigognani, Consul, Rome.
Alex. Hammet do Naples.
Benj. Gardner do Palermo.
John L. Payson do Messina.

SMYRNA.

David Offley, Consul, Smyrna.

BARBARY POWERS.

William Shalcr, Consul General, Algiers.
Samuel D. Heap do Tunis.
Charles D. Coxe do Tripoli.
John Mullowny do Tangier, Morocco.

HAYTI, (ST. DOMINGO.)

A. Armstrong, Commercial Agent, Port au Prince.
James A. Holden do Aux Cayes.
James E. Brice do Cape Haytien.

SANDWICH ISLANDS.

John C. Jones, Jr. Commercial Agent.

CHINA.

John H. Grosvenor, Consul, Canton.

Memoranda of the Signers of the Declaration of Independence.

Chancellor Wythe, of Virginia—A lawyer, udge of the purest morals and deepest learn-g, idle and dissipated until thirty years of age, ien he first applied himself to the law, the eceptor of Jefferson.

George Read, of Delaware—An eminent vyer. His biography is ample, interesting, d authentic.

William Williams, of Connecticut—Originlly a town clerk, but liberally educated—en an upright, benevolent merchant, sacrid the greater part of his gains to the public vice.

Samuel Huntington, of Connecticut—a mere oughman until his twenty-second year, afterrds an eminent lawyer, president of Conss, chief justice of his state, and governor. s biography highly curious.

William Floyd, of New York—A farmer, a neral, enjoyed a large share of state honours.

George Walton, of Georgia—Originally an prentice to a carpenter in Virginia, self-edu-ted to the law, a colonel, wounded in battle, ice governor of Georgia, chief justice, sena-r of the United States.

George Clymer, of Pennsylvania—A mer-ant, fond of literature, a terse, sententious iter, an efficient and honourable patriot. His ography full and interesting, but diffuse:

—"Goodness his delight,
Wisdom his wealth, and glory his reward."

Benjamin Rush, as a physician and an author, *omni laude cumulatus*, the most celebrated of the American faculty, distinguished for his political connexions and labours.

Matthew Thornton, of New Hampshire—A successful practitioner of medicine, army surgeon before the revolution, a president of the provincial convention, a judge of the Supreme Court, a man of wit and humour, continued to practice physic while a judge, wrote political essays for the newspapers, and prepared a metaphysical work for publication, after he was eighty years of age: died in his eighty-ninth year.

William Whipple, of New Hampshire—Originally a cabin boy and sailor, a captain at the age of twenty-one, then a merchant, a general, who fought with Gates, and elsewhere, arranged the capitulation of Burgoyne, a judge of the superior court; "As a sailor," says the biography, "he speedily attained the highest rank in his profession, as a merchant, he was circumspect and industrious, as a congressman, he was firm and fearless, as a legislator, he was honest and able, as a commander, he was cool and courageous, as a judge, he was dignified and impartial, and as a member of many subordinate

public offices, he was alert and persevering. He bore all his honours with modesty and propriety."

Dr. John Witherspoon, of New Jersey, an eminent and profound pivine, president of Nassau Hall College, a political writer of force and talent, a statesman of great influence and energy. His biography is ample and instructive.

Robert Morris, of Pennsylvania, a merchant, the unrivalled financier of the revolution, the pecuniary soul of the cause. His biography, like that of others, needs compression, but it is interesting and correct.

Abraham Clark, of New Jersy, a surveyor, a lawyer, and gave gratuitous counsel.

Francis Lewis, of New York, a merchant, and soldier, before the Revolution, very useful as a rebel, his fine estate on Long Island destroyed by the British, and his wife carried off a prisoner, she died soon after, from the ill treatment which was experienced. He was ruined by the part which he took on the American side —died in the ninetieth year of his age.

John Penn, of North Carolina, uneducated in early life; became a lawyer, and eminent, by opsimathy.

James Wilson, of Pennsylvania, a lawyer, of rare capacity, and of surpassing faculties as a speaker and writer, an efficient political essayist, the principal advocate of the Constitution of 1787, in the Pennsylvania Convention, professor of law, one of the judges of the Supreme Court of the United States. His biography is replete with valuable information and political anecdote.

Carter Braxton, of Virginia, a planter, became a merchant, lost all, and died of a broken heart.

John Morton, of Pennsylvania, a surveyor, speaker of the General Assembly of Pennsylvania, a judge of the Supreme Court of the commonwealth, gave the casting vote of the Pennsylvania delegation, for the declaration of independence, originally a ploughboy.

Stephen Hopkins, of Rhode Island, a plain farmer, surveyor, became speaker of the assembly, chief justice, then governor of Rhode Island, a man of superior sense, and a good and successful writer, a distinguished mathematician, and natural philosopher, though his education was slight, and a member of the American Philosophical Society. His signature of the declaration is the only crooked and feeble one. "As it indicates," says his biographer, "a very tremulous hand, in perfect contrast with the bold and prominent writing of President Hancock, it may have engendered surmises unfavourable to the determined spirit of Mr. Hopkins. We therefore state, that for a number of years previous, he had been afflicted with a nervous affection, and when he wrote at all, which was seldom, he was compelled to guide his ri hand with his left."

Thomas M'Kean, of Pennsylvania, a law of great abilities and ardent revolutionary triotism, chief justice of the commonweal governor, died eighty-three years old. His ography entirely authentic, and replete w instructive details.

James Smith, of Pennsylvania, lawyer a surveyor, remarkable for facetiousness and centricity, practised the law for upwards of s ty years, died a nonagenarian. His article v pleasant.

Thomas Nelson, of Virginia, educated England, an opulent planter, active milit officer, commander-in-chief of the Virginia litia, whom he bravely and skilfully headed the siege of Yorktown, governor of Virgi died in reduced circumstances, having m enormous pecuniary sacrifices to the revo tionary cause.

Joseph Hawes, of North Carolina, a succe ful merchant, bred a Quaker, died when atte ing Congress, in 1779.

George Taylor, of Pennsylvania, on arriv in America from Ireland, bound himself fo term of years, as a common labourer, at the i works at Durham on the Delaware, near Ea on, was made clerk to the works, the proprie dying, he espoused his widow, and finally came himself owner of the whole, amasse large fortune, got into the provincial assemb a member of business—Nothing more is rec lected of him in the vicinity of his residen than that "he was a fine man and a furi whig."

John Hart, of New Jersey, a farmer, surna ed "honest John," had never held a pub office, when he was chosen a delegate to C gress, his farm pillaged and destroyed by Hessians, his biography possesses a pecul interest, as a very edifying illustration of character and course of an American yeom

Lewis Morris, of New York, gentleman f mer and large landed proprietor, his whole main laid waste and ruined by the enemy, h three gallant sons in the field, the celebrat Gouverneur Morris his half brother.

Wm. Ellery, of Rhode Island, a well educ ted lawyer, an early revolutionary patriot, very useful member of Congress, throughc the war. "He often," says his biograph "spoke of the signing of the Declaration of dependence, and he spoke of it as an eve which many regarded with awe, perhaps, wi uncertainty, but none with fear. He used relate, that he placed himself beside the Sec tary, Thompson, and eyed each delegate clo ly as he affixed his name to the document, a he saw dauntless resolution in every count nance. Ellery died without pain at the age

linety-three, sitting upright in bed, and read-
og Tully's Offices in the Latin.

"Of no distemper, of no blast he died,
But fell like autumn-fruit that mellow'd long;
Ev'n wonder'd at because he falls no sooner.
Fate seemed to wind up for fourscore years:
Yet freshly ran he on twelve winters more;
Till, like a clock worn out with eating time,
The wheel of weary life at last stood still."

Lyman Hall, of Georgia, an emigrant from
onnecticut, a well trained physician, a useful
ember of Congress, made great sacrifices,
overnor of Georgia, 1783.

Oliver Wolcott, of Connecticut, a graduate
f Yale College, captain in the army before the
evolution, studied modicinc, a major general
f militia, aided in conquering Burgoync, a
idge, finally Governor of Connecticut.

Richard Stockton, of New Jersey, an accom-
lished lawyer and scholar, unrivalled at the
ar of his state. After acquiring a competent
rtune in his profession, travelled with much
clat in Great Britain, one of the judges of the
upreme Court of New Jersey, embarked early
nd vehemently in the Revolution, surprised
nd captured by the enemy, and committed to
ne common jail at New York. Congress direct-
sd General Washington to interfere in his be-
alf, and threaten retaliation, his health impair-
d, his property devastated, died prematurely
f complicated afflictions, occasioned by his pa-
iotism.

Button Gwinnett, of Georgia, originally a
erchant, became a planter, an enthusiastic
ebel, president of the provincial council, killed
a duel with general M'Intosh, 1777, at the
ge of forty-five.

Josiah Bartlett, of New Hampshire, a suc-
cessful practitioner of medicine, a leading whig
in his province, commanded a regiment, the
first who voted in Congress for the Declaration,
and the second who signed it, chief justice of
New Hampshire, the first republican governor
of that state.

Philip Livingston, of New York, one of the
committee of five appointed to prepare the De-
claration of Independence, a graduate of Yale
College, a prosperous and honoured merchant,
conspicuous member of the provincial Legisla-
ture, speaker, died while attending Congress,
in 1778, a martyr to his public zeal.

Roger Sherman, of Connecticut, also one of
the committee of five, apprentice to a shoema-
ker, and pursued the business until after he
was twenty-two years of age, travelled on foot
with his tools, gaining a livelihood, nourished
his mind by various reading, kept a country
store, turned surveyor, applied himself to the
law, acquired practice and fame, member of the
colonial assembly, member of the Albany con-
vention of 1754, judge of the superior court of
Connecticut, twenty-three years, member of
Congress from the opening of the first in 1774,
down to the period of his death, in 1798, of great
authority and usefulness, a member of the con-
vention that framed the present constitution of
the United States, took a considerable and in-
fluential part in the debate, a senator in Con-
gress, a shrewd and ready writer, a logical de-
bater, a model of probity, discretion, and stead-
fastness, as much revered as any patriot of the
times. His biography is full of instruction, but
prolix to tediousness.

Foreign Monies, Weights, and Measures.

eneral Index of the Foreign Monies, Weights, and
Measures referred to in the Consular Reports, with
comparisons and explanations.—By Dr. KELLY.

It should be observed, that all the comparisons and
xplanations of foreign measures are here computed
ccording to the new British imperial standard,
hich is about 3 per cent, larger than the Winchester
easure, or, more nearly, 31 gallons, bushels, &c. of
e new, answer to 32 of the old. Hence to reduce
mperial measure to Winchester, add the thirty-first
art to the number of gallons, &c.; and for the re-
rse operation, subtract the thirty-second part. The
ntrary calculation must of course, be observed with
gard to prices. But these several proportions can be
ly stated with perfect accuracy in a regular treatise
Metrology, and as this Index is merely intended
give general illustrations, all minute fractions are
itted.

Alberts Dollar, a money used in Libau and Riga;
rth about 4s. 6d. sterling.

Alqueire, a corn measure in Portugal, answering
three imperial gallons.

Arroba, a Spanish weight, answering to 25 1-4lbs.
oirdupois.

Barrel, or *Tunna*, a corn measure in Sweden, an-
vering to 4 1-2 imperial bushels. Barrel is also a
weight for flour in America and weighs 196lbs. avoir-
dupois.

Boisseau, a corn measure in Bordeaux, containing
2 1-2 imperial bushels.

Cent, or *Centime*, the 100th part of a coin. It is of
various values, according to the unit.

Charge, a corn measure at Marseilles, Nice, &c.
answering to 4 1-2 imperial bushels

Chetwert, a corn measure in Russia, which con-
tains 5 3-4 imperial bushels.

Copec, a Russian money, the 100th part of the
rouble.

Dollar, a Spanish coin, and intrinsically worth
4s 3 3-4d., but is generally valued at 4s. 6d. The
paper dollar of exchange in Spain is worth 36d. ster-
ling, and at Leghorn 48d.

Ducat, a gold coin in Holland, of extensive use in
the corn trade, is worth about 9s. 4d. sterling. There
are various other ducats in different countries, in gold,
silver, and paper.

Fanega, a corn measure in Spain, containing about
one bushel 4 1-2 gallons imperial measure; there are
however different sized Fanegas: thus, there are the
large, the regular, and the small Fanega, which are
to each other as 11, 10, and 9, nearly.

Ferrado, a corn measure at Corunna, about 3 3-4
imperial gallons.

Florin, a coin and money of account in various countries. In Holland it is also called the Guilder, and is worth about 21d. sterling. It is divided in Holland into 20 stivers of 16 pfennings each; but in other countries into 60 Kreutzers. Fls. Gr. means, at Dantzic, Florins and Groschen. The Netherland guilder is divided into 100 cents, and is equal to the florin in exchange.

Franc, a silver coin and money of account in France and other places. It is generally valued at 10d. sterling, which is something above its intrinsic value.

Grosche, a money of account in various parts of Germany, and of different values; 24 generally make the rixdollar.

Grote, half of a Dutch stiver, and at Hamburg half the sol or shilling.

Guilder, also called *Gulden*, a money of Holland. See florin. The gold guilder is much used in the corn trade, and is reckoned worth 28 stivers, or about 30d. sterling.

Guilder Current, a money of the Netherlands, seven of which equal six guilders of exchange.

Halster, a corn measure in the Netherlands, answering to about 6 1-2 gallons imperial measure.

Hectolitre, the principal corn measure of France, answering to 2 3-4 imperial bushels.

Killo, a corn measure in Turkey, containing about 7 1-2 imperial gallons.

Kilogramme, the principal weight in France, answering to 2lb. 3oz. 4dr. avoirdupois.

Kreutzer or *Creutzer*, a small coin and money of account in Germany and other northern nations. In Austria it is at present worth about 7d. sterling.

Last, a large measure for corn in Holland, Germany, &c. varying from 10 to 12 imperial quarters.

Livre, an imaginary money of France and several other countries. It is generally considered of the same value as the franc. In Italy it is called the lira, and is mostly divided into 100 centimes.

Lof, a corn measure in Libau and Riga, containing about 1 7-8 bushel imperial measure.

Malter, a corn measure in many parts of Germany; at Frankfort it answers to four imperial bushels.

Maravedi, a small money of account in Spain, 34 of which make the real or rial.

Metze, a corn measure in Fiume and Trieste, answering to 1 3-4 imperial bushel nearly.

Milrea, a money, of account and exchange in Portugal, worth about 5s. 7d. sterling.

Mina, a corn measure in Genoa, equal to about 3 bushels 3 gallons imperial measure.

Mudde, a corn measure in Holland, answering formerly to 3 1-4 English bushels; but in the new system of the Netherlands the mudde is reckoned the same as the hectolitre.

Paolo, a money of Italy, worth about 5d. sterling.

Peseta, a Spanish silver coin: one-fifth of the hard dollar.

Pezza, the dollar of exchange at Leghorn; worth about 4s. sterling.

Quintal Metrique, a French weight of 100 kilogrammes, answering to 220 1-2 lbs. avoirdupois or 2 cwt. less 3 1-2 lbs.

Quintal, a Spanish weight of 4 arrobas, or 100 Castilian pounds, answering to about 101 1-2lb avoirdupois. It is also a corn measure at Bordeaux containing about 2 imperial bushels.

Real, a Spanish money of different values. The real Vellon is the most common, and is worth about 2 1-2d. sterling; 20 such reals make the hard dollar.

Rixdollar, or *Thaler*, a coin and money of account in most northern nations. It is of different value and variously divided.

Rouble, a money of Russia, which has varied considerably in value, viz. from 3s. 2d. down to 9d. sterling; 10d. is its present price.

Rubbio, a corn measure in Ancona, answering to nearly an imperial quarter.

Sacco, a corn measure of Leghorn, containing about 2 imperial bushels.

Scudo, an Italian coin, worth about 4s. 4d. sterling.

Setier, a corn measure in France, answering to about 1 1-2 imperial bushel.

Sheffel, a corn measure at Dantzic answering to about 1 1-2 imperial bushel. It varies, however, in several parts of Germany.

Skilling, a division of the rixdollar. In Sweden it is the 48th part, and is divided into 12 rundesteeker.

Soma, a corn measure in the Venitian States, answering to 2 3-4 imperial bushels.

Stajo, a corn measure in Italy, of various dimensions. In Friuli and Trieste it answers to about 2 imperial bushels.

Stiver, a money of Hollaud, worth nearly 1d. sterling. It is 1-20th of the florin or guilder, and is divided into 16 pfennings, or 12 deniers,

Gradual change of the Earth's Surface produced by Running Water.

If a small lake or extensive mill-pond, with very uneven bottom, were suddenly emptied by a sluice or opening in its lowest part, a vast number of pits or pools, of various size and shape, would be left among the inequalities of the bottom. But supposing rain to continue falling, or frequently to recur, a remarkable change would soon be effected; each pool by running over at its lowest part, and sending out a streamlet either into another lower pool or into a channel leading directly to the sluice or opening, would be wearing away the part or side over which the water was running, so that the breach or channel would become gradually deeper, and the water in the pool would consequently become shallower; while at the same time the bottom would be filling up with the sand or mud washed down by the rain from the elevations around; and these two operations being continued, the pool would at last disappear altogether. This operation going on in every pool through the whole of the emptied mill-pond, the bottom would at last exhibit only a varied and undulated surface of dry land, with a beautiful arrangement of ramifying channels, all sloping with a precision unattainable by art, to the general mouth or estuary. The reason that in the supposed case, and in every other, a water course soon becomes so singularly uniform as to dimension and descent is, that any pits or hollows in it are soon filled up by the sand and mud carried along the stream, and deposited where the current is slack; while any elevations are worn away by the action of the more rapid current which accompa

ies shallowness, until throughout the whole line only uniform and gradual slope remains.

The present kingdom of Bohemia, for instance, is ne bottom of one of the great lakes which once cov-red Europe. It is a basin or amphitheatre, formed by ircular ridges of mountains, and the only gate or pening to it is that remarkable one by which the wa-er escapes from it, and which has evidently been gra-ually cut or formed by the action of a running stream. As the bottom became uncovered by the sinking of the vater, and by the formation of a regular sloping chan-el from every part, the former lake was converted nto a fine and fertile country, a fit habitation for man; nd the continued drain from it is the beautiful river hich we now call the Elbe.

In Switzerland, even now many of the valleys hich were formerly lakes, have the opening for the xit of water so narrow, that, as happened in one of nem a few years ago, a mass of snow or ice falling nto it, converts the valley once more into a lake On he occasion alluded to, the accumulation of water vithin was very rapid; and although, from the danger reseen to the country below if the impediment should uddenly give way, every means was tried to remove t gradually, the attempt had not succeeded, when the rightful burst took place, and involved all below in ommon ruin.

The magnificent Danube is the drain of a chain of asins or lakes, which must at one time have discharged or run over one into another, but the continued stream cutting a passage at last low enough to empty them all, they are now regions of fertility, occupied by civilized man, instead of the fishes which held them formerly. The lake of Geneva, for instance, although confined by granite rock, is cutting and lowering its outlet, and the surface has fallen considerably within the period of accurate observation and records, and the wearing of the neighbouring mountains, brought down by the winter torrents, are filling up its bed. If the town of Geneva last long enough, its inhabitants will have to speak of the river in the neighbouring valley, instead of the picturesque lake which now fills it. Already several other towns and villages, which were close upon the lake a century ago, have fields and gardens appearing between them and the shore.

The immense continent of Australasia, or New Holland (larger than Europe,) is supposed by some to have been formed at a different time from what is called the old world; so different and peculiar are many of its animal and vegetable productions; and the idea of a later formation receives some countenance from the immense tracts of marshy or imperfectly drained land which have been discovered in the interior, into which rivers flow, but which seem not yet to have worn down or formed a sufficient outlet or discharging channel towards the ocean.—*Arnott's Elements of Physics.*

Dancing with a prince.—You did not know Maria D——, I think; but I did: and fairer prospects never dawned on the sunny eye of youth, beauty, and ntelligence, than seemed to be hers. But unfortunately, her mamma had once been in England; and as ill luck would have it for poor Maria, had danced n the same room, nay, I believe, in the same set with the prince of Wales. Of course she could never talk or think of any thing else all her life afterward. t was shrewdly suspected that she put her husband to a lingering death with this story; and it is pretty certain that it caused all the misfortunes of my little associate, on whom nature had showered all the blossoms of spring, and who promised a rich product of delightful fruits in summer and autumn. But this unlucky dance spoiled all. The mother told the story morning, noon, and night, and danced that fatal dance over and over again, to the same tune, until the young lady could think, and talk, and dream, of nothing but figuring at court, and dancing with princes and lords, whom she fancied something or other, she knew not what, but far above any thing on this side the water.

The mother never heard of a foreigner being in town that she did not get the fidgets, until he was brought and introduced to the daughter, who soon, in her anxiety to go abroad, actually paid such broad attentions to those exotics, that instead of being alluring to the worthy among them, she became offensive. Unfortunately, though she had not fortune to tempt the avaricious, she possessed sufficient beauty to attract the voluptuary. One of these wandering creatures, who stroll about the world to cheat the rich, and betray the inexperienced; who come to our country no one knows whence, and live no one knows how; and who gain a footing in our social circles by means of this pernicious leaning towards strangers,—chanced to come prowling that way, and was as usual, brought to the house of the good lady who once had the honor of dancing in the same set with the prince.

He passed for a man of rank,—talked of his noble relations,—of going back to England,—of the delights of courts, watering places, and, in short, played on all that light artillery before which the ill-fortified citadel of woman's heart so often yields The good lady mother talked with the man of rank about certain lords whose names she had heard in England, and who were all his intimate acquaintances. He described them at a hazard, or rather at no hazard, for he soon discovered my lady knew as little as himself about them. In short, to make an end of a long story,—the old lady fidgeted,—the young one played off the fine lady,—till, at last, with great apparent circumspection, the illustrious foreigner asked her hand in preference to running away with her, because she had a few thousand dollars portion. The catastrophe rapidly took place. As soon as he had got possession of the money, and was tired of his bride, he ran away, no one knew where. Poor Maria never was presented at court; but pines away, in the most heart-sickening widowhood—a deserted wife; and the poor mother has never since told the story of dancing in the same set with the prince.

Showing the Time of Sun Rising and Setting for any place in the United States.

To find the time of Sun rising or setting for any place in the United States from the annexed Table: Take the latitude of the place on the top. and the sun's declinaiton on the side, under the former and opposite the latter, will give the time of sun setting or rising.

Observe that this Table is calculated for the declination of the sun when North, and that when the declination is South, the time of sun rising exhibited in the Table will be time of sun setting;—also, the time of sun setting will be time of sun rising.

EXAMPLE I.

Required the time of sun rising and setting at Philadelphia, on the 20th May.

In the Almanac for the month of May, opposite 20, the day of the month, and in the column under (sun dec.) the sun's declination, is 20 N. In the annexed Table opposite 20 thus found, and under 40, the latitude of Philadelphia, the numbers 7 11 4 are given; that is 7h. 11m. for sun setting, as marked on the top, and 11 minutes before 5 for sun rising.

EXAMPLE II.

Required the time of sun rising and setting at Philadelphia on the 25th of February.

In the Almanac for the month of Fabruary, opposite 25th, the day of the month, and in the column under (sun dec.) the declination of the sun, is 9 S. In the annexed Table, opposite 9 thus found, and under 40, the numbers 6 31 6 are given, and agreeable to the directions on the top of the Table, when the declination is North, 6h 31m. shows the sun setting, and 31 minutes before six for sun rising;—but in this instance, as the sun's declination is south, the sun rising must be taken for the sun setting, and the sun setting for the sun rising, as shown in the observation above;—therefore, on the 25th February, at Philadelphia, the sun sets at 31 minutes before 6, and rises 6h. 31m.

Sun's dec. N.	30°		31°		32°		33°		34°		35°		36°		37°		38°		39°		40°		41°		42°		43°
